

SEOS-xxxx Interface API overview

asdf

Page Content

- List of Libraries
- List of CAmkES Interfaces
- List of APIs

This is based on SDK v1.3

List of Libraries

	realize APIs	used by			
chanmux	none	Component ChanMux Tool proxy			
chanmux_nic_driver	none	Component NIC_ChanMux			
lib_compiler	none	various libs and components			
lib_debug					
lib_host					
lib_io					
lib_logs					
lib_macros					
lib_mem					
lib_osal					
lib_server					
lib_utils					
os_cert	OS_CertParser.h				
os_configuration					
os_crypto					
os_filesystem					
os_keystore					
os_logger					
os_socket					
os_tls					

List of CAmkES Interfaces

without demos

Name	File	.camkes. h file	.h file	_ASSIGN function	used in	Macros	specifics
if_CertServer	if_CertServer.camkes		yes	yes	Component CertServer	no	
if_TlsServer	if_TlsServer.camkes		yes	yes	Component CertServer demo_tls_api	yes	uses internally IF_OS_TLS_CAMKES

if_NetworkStack_PicoTcp_Config	if_NetworkStack_PicoTcp_Config.camkes				Component NetworkStack_PicoTcp demo_iot_app demo_iot_app_rpi3	yes	
if_CryptoServer	if_CryptoServer.camkes		yes	yes	Component CryptoServer	no	uses internally IF_OS_CRYPTTO_CAMKES
if_OS_Nic	if_OS_Nic.camkes				all NIC Components Component NetworkStack_PicoTcp	yes	
if_OS_Socket	if_OS_Socket.camkes		yes	yes	Component NetworkStack_PicoTcp Component TlsServer demos	yes	
if_OS_Timer	if_OS_Timer.camkes	yes	yes	yes	Component NIC_RPi Component NetworkStack_PicoTcp Component RPi_SPI_FLASH Component TimeServer demos	no	uses internally IF_OS_TIMER_CAMKES
if_OS_Crypto	if_OS_Crypto.camkes	yes	yes	yes	Component CryptoServer	no	- uses internally IF_OS_CRYPTTO_CAMKES - CryptoServer doesn't require it - Not really used anywhere
if_OS_Logger	if_OS_Logger.camkes				Component ChanMux Component NIC_iMX6 Component NIC_ChanMux Component_NIC_Dummy demos	no	
if_OS_BlockingWrite	if_OS_BlockingWrite.camkes				Component ChanMux Component UART	no	
if_OS_Tls	if_OS_Tls.camkes	yes	yes	yes	none	no	- uses internally IF_OS_TLS_CAMKES - Not really used anywhere
if_OS_ConfigService	if_OS_ConfigService.camkes				demos	no	
if_OS_Entropy	if_OS_Entropy.camkes	yes	yes	yes	Component CertServer Component EntropySource Component TlsServer Component CryptoServer demos	no	uses internally IF_OS_ENTROPY_CAMKES
if_OS_Storage	if_OS_Storage.camkes		yes	yes	Component Storage_ChanMux Component SdHostController Component RamDisk Component Cryptoserver Component RPi_SPI_FLASH Component StorageServer demos Tool rpi3_flasher	no	
ChanMuxDriverInf	if_ChanMux.camkes				Component ChanMux Component NIC_ChanMux	no	- location of folder is strange - NIC_ChanMux doesn't need it

List of APIs

file	Library API	CAMkES Interface API	Specifics
OS_CertParser.h	os_cert	if_CertServer	
OS_ConfigService.h	os_configuration	demo specific components	
OS_Crypto.h	os_crypto	if_OS_Crypto if_CryptoServer	- several specific additional headers - should be moved out of subfolder
OS_Dataport.h	is included	-	header file includes function definitions
OS_Error.h	no functions	no functions	only enum and Macros
OS_FileSystem.h	os_filesystem	-	
OS_Keystore.h	os_keystore	-	with virtual function table
OS_Socket.h	os_socket	if_os_socket	os_socket is only client side lib to if_OS_Socket,
OS_Tls.h	os_tls	if_os_tls if_tlsserver	os_tls contains runtime selection of library or RPC implementation
OS_Types.h	no functions	no functions	- OS_SharedBuffer_t only used by NIC_Chanmux - propably can be removed mid term
OS_Logger<XXX>.h	os_logger	independent	- With OS_LoggerEmitter_getInstance() the library is set up independently of RPC calls. A user can give an RPC function and a dataport, so using CAMkES RPC calls. But a user could also give a local buffer and a local function. - several specific header files - should be moved out of subfolder
OS_NetworkStackTypes.h	no functions	no functions	- only typedefs - should be moved out of subfolder
OS_NetworkTypes.h	no functions	no functions	- only defines - should be moved out of subfolder
OS_SocketTypes.h	no functions	no functions	- only typedefs and defines - should be moved out of subfolder
